STONY PLAIN, ALBERTA THURSDAY, FEB. 6, 1930

Whole Number 406

Free Tractor School.

For the benefit of owners, and prospective owners of John Deere Tractors, a Free Tractor School will be held at the John Deere Building, corner of 107th St. and 103d Av., Edmonton, on Tuesday and Wednesday, Feb. 18th and 19th, starting at 9 a. m.

The School will thoroughly instruct the student in the Care, Maintenance and Operation of the tractor. The talks will be illustrated by charts and lantern slides—special equipment will be used to demonstrate tractor parts and their adjustment. Manual instructions on tractors will also be given.

Professor Macgregor Smith of the Agricultural Engineering Department of the University of Alberta will speak on selected subjects connected with power farming. The School will be of great interest to every farmer owning, or about to own, a John Deere tractor.

We specially invite you to be present at this School on the above dates **February 18th and 19th**, and will be glad if you will let us know as early in advance as possible of your intention to attend. We have to advise the Company of the number they may expect from this district.

Stony Plain and District.

Mr. C. Clark, the Hansen's Corners school trustee, was a caller at The Sun office Saturday, and stated that he was glad to learn (thru the columns of The Sun) that he was "feeling much better." Mr. Clark stated further that he never had been ill, that he was aware of.

Kelly's Store is being repainted and re decorated.

Mr. Pete Baumbarger, the enterprising Garden Valley farmer, shipped a car of No. 2 wheat to the Coast terminal this week.

The Newest Chevrolet.

A shipment of the newest 1930 Chevrolets came to the Service Garage Friday last. These are the very last word in auto-construction, and present a beautiful appearance. In an interview, Mr. Sommerfeld said: "The development of color schemes on the new bodies has shown the influence of real artists. This year there is apparent more attention to the relation of secondary tones to the main motif. Altho simplicity in color is noticeable, a lavish presentation of colorful names descriptive of tone has made its appearance. For instance, one of our new Chevrolet models is finished in Scarba green Duco with Arizona gray moldings and Tusk ivory striping. The wheels are done in the same fashion."

The new Chevrolet has 76 new improvements designed for increased power, riding comfort, etc. Among these are hydraulic shock absorbers, front and rear, improvements in the four wheel braking system, larger tires and smaller wheels, and the Fisher non-glare windshield. There are 8 models of the new Chevrolet, 3 being of the open type.

A New Hope For The World

The five-power naval conference is in session in London, England, at this article is written. It is a momentous gathering, fraught with great possibilities for the good of all mankind. Assembled around the conference table are leading statesmen of Great Britain, United States, France, Italy and Japan, the five greatest naval powers in the world. The British delegation also includes representatives of the self-governing Dominions and India.

The problem confronting these eminent statesmen is to find some basis of agreement whereby a step can be put to further competitive building of ships for warlike purposes, and, if possible, to provide for a substantial reduction in the number of existing ships by scrapping some now in commission and providing that there shall not be replacement of others when they become old and obsolete.

So worded, the average man would be inclined to say that it should not be a very difficult matter to reach an agreement, but the problem is by no means so simple as it seems to the layman. One country places greater reliance on huge battleships than does another country, others desire many fast cruisers of moderate tonnage, others feel their necessities call for larger cruisers, some want a great number of submarines, while others are prepared to outlaw them altogether. Great Britain is ready to abolish both submarines and the huge battleships, and rely on cruisers of moderate tonnage. The United States is agreeable to the outlawing of the submarine, but still feels the necessity of the big ship. France is opposed to abolishing submarines. And so it goes.

And there is something to be said for each contention. Great Britain has colonies and coaling stations, oil and supply depots all over the world. The moderately sized cruiser will, therefore, fit into her requirements for defence of her great shipping and commerce. But other countries, lacking such re-fueling and supply depots, feel the need of larger ships, carrying greater quantities of fuel and supplies, so as not to be forced back to home ports too frequently. France is convinced that the submarine is her great arm of naval defence inasmuch as she cannot hope to compete with Britain and the United States in the building and maintenance of large battleships and cruisers.

However, the conference is a hopeful sign of the desire of the nations to lessen the burden of armaments and consequently to decrease the possibility of war. One thing is certain, and that is that the people in all countries are extremely anxious that their leaders should succeed in reaching some unanimous conclusions. They are the ones who have to bear the burden of taxation imposed for these huge armaments; it is their sons who are withdrawn from productive employment to man the navies, and undergo intensive training for possible future slaughter.

The most hopeful feature of the present conference is that it has been preceded by conferences between the nations at which efforts have been made to find common ground, to iron out old differences, to allay old suspicions. The conference may not achieve all that might be hoped for and desired, but if it marks a further advance on the work of the Washington Conference of some years ago, much will be gained, and the way be paved for further reductions and understandings in another few years. Thus step by step will progress be made.

An example of this willingness to consider and appreciate the other fellow's viewpoint and position, instead of ignoring or misrepresenting them, is found in a recent issue of the Philadelphia Evening Bulletin. It states some home truths for the United States readers. To quote in part: "The salt water, I believe, is freest of all, in peace, within that jurisdiction—the British—where it was formerly (in centuries past) least free. Britain accords the peaceful world, so far as her writs run, complete maritime freedom and equality, even within her own ports and coastal waters. Her port charges are the same to others as to British. Foreign ships may take part in her coastwise trade.

"Her broad theory in this maritime commerce, under whatever flag it may move, holds out some hope of profit to the greatest contemporaneous seafaring peoples. No other nation is of like mind—the Italian, not the French, not the Japanese, not the American. Our coastwise trade, for example, is reserved rigidly for vessels of American registry, and none other may ply between our home ports and those of our overseas territories."

Recognition of this broad liberty accorded to the shipping of all nations by Britain, as contrasted with the narrower policy adhered to by all other great naval powers, thus openly presented to the readers of a great United States paper, is an indication of that better and more cordial feeling toward Britain now so evident in the neighboring republic. It is because such better feelings do exist, and are growing stronger, that hopes for the success of the present naval conference are so high.

When Food
Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Canada's Cabinet Ministers

Oldest Is Hon. W. R. Motherwell, and Youngest Hon. C. A. Dunning

Hon. W. R. Motherwell, Minister of Agriculture, who has just celebrated his seventieth birthday, is the oldest member of the Dominion Cabinet. The youngest is Hon. C. A. Dunning, who at 45 is Minister of Finance. The others are: Postmaster—general Veniot, 66; Minister of Interior, Stewart, 61; Minister of Health, King, 57; Minister of Public Works, Elliott, 57; Prime Minister King, 55; Minister of Labor, Heenan, 54; Minister of Customs, Euler, 54; Minister of Justice, Lapointe, 53; Minister of Railways, Crean, 53; Minister of Marine, Cardin, 50; Minister of Trade and Commerce, Malcom, 49; Minister of National Defence, Ralston, 48; Secretary of State, Rinfret, 46; Solicitor-General, Canon, 42; Minister of Immigration, Forke, who has just resigned, was 69. Including the last named, this makes an average of about 55 for the seventeen, a figure which for that class of work affords the vigorous age classification.

University of Alberta

Debaters Win a Three To One Verdict Over Manitoba in Inter-University Contest

Piling up a conclusive argument which completely controverted that of their opponents, the University of Alberta debaters recently defeated the University of Manitoba by a three-to-one verdict of the judges for the McGowan Cup.

Alberta speakers upheld the affirmative of the subject, "Resolved that total disarmament is essential to world peace."

The debaters for Alberta were David Sigler and F. E. L. Priestley, and for Manitoba, Ronald M. Macdonnell and R. Gerald Ridell.

CAN YOU WITHSTAND RIGORS OF WINTER?

Or Are You Subject To The Many Ills Of This Trying Season?

The rigors of winter sap the vitality of even the strongest. Lack of exercise, overheat rooms and a restricted diet will gradually impoverish the blood and impair the health. That is why you are susceptible to colds—why you find such difficulty in throwing them off.

To be proof against cold, flu or fevers, the alimentary system must be nourished by rich, red, health-giving blood. A tonic medicine must be taken to build up this rich, red blood. Such a tonic is Dr. Williams' Pink Pills—thousands recommend them as a remarkable blood-builder and winter tonic.

Concerning them Mrs. Jackson Jenkins, One Sunday, Oct. 1, writes: "After a severe attack of flu I found myself very much run-down. I was advised to try Dr. Williams' Pink Pills and they fully restored my health and strength. I can heartily recommend these Pills to anyone whose blood is in an impoverished condition."

Start taking Dr. Williams' Pink Pills today and you know soon you feel the benefit. They are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discover Cancer Serum

Two San Francisco Surgeons May Make Important Contribution To Medical Science

Discovery by two San Francisco surgeons of what they call a "cancer-killing serum," was disclosed when it became known that medical agencies of the University of California have decided to co-operate in further experiments with the substance.

The originators, Dr. Walter Bernard Coffey, chief surgeon of the Southern Pacific Hospital, and Dr. John D. Humber, his colleague, specified that the serum was not to be regarded as a cancer cure, but asserted that it was able to kill cancerous tissues.

The serum is derived from the outflow of the adrenal glands of sheep.

Only the unimpaired endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

A British printer has discovered a method of producing luminous ink in various colours, for reading in the dark.

Grandmother Knew—She Used Minard's.

Don't be a martyr to unnecessary pain.

Lots of suffering is, indeed, quite needless. Headaches, for example. They come without warning, but one can always be prepared. Aspirin tablets bring prompt relief. Keep a bottle of them at the office. Carry the small tin in your pocket. Then you won't have to hunt a druggist, or wait till you get home. And do not think that Aspirin is only good for headaches, sore throats, and colds. Read the proven directions for relieving neuralgic, neuritic, rheumatic and other aches and pains. Remembering, of course, that the quick comfort from these tablets is not a cure; for any continued pain, see a doctor.

Purchase genuine Aspirin. Protect yourself by looking for that name. Always the same. Always safe. Never hurts the heart.

ASPIRIN
TRADE MARK REG.

Good Speakers Nervous

Would Get Out Of Addressing Crowds If It Were Possible

Right Hon. Jan Christian Smuts, war hero and leading statesman, during a memorable address in Toronto, said: "I have never learned in a long political life to shake off a certain nervous trepidation when I have to face my fellow-men in mass formation. And I am not sure that the political mass formation is not more terrifying than the military formation." No doubt many other public men could tell of similar feelings. The Hon. William Patterson, one of the best known campaign speakers in Canada, told a friend with whom he was discussing his political career, that despite his lengthy experience in addressing public gatherings, if at any meeting just before he arose, somebody had opened a door behind him he would have bolted through the portal.

Canadian Steamships

New Canadian Government Shipbuilding Deal Is Rumored

The London Sunday News states that a large shipbuilding contract for a new Canadian Government line of passenger and cargo steamers may shortly be placed in Liverpool. The newspaper stated contracts had already been invited for construction of a fleet of ships to run between Montreal and Cape Town and India.

Canada Is Largest Exporter Of Wheat In the World and Ranks Second In Production

In the comparatively short period of three-score years, Canada has emerged from an insignificant position in world production to that of the largest exporter of wheat, and ranks second (excluding the Russian Soviet Union), as a producer of wheat, raising, on an average, about ten per cent. of the total world production, only the United States exceeding Canada in this regard.

Wheat and flour were exported from the Dominion during the crop year 1928-29, to nearly 80 countries, the total amounts being 354,424,698 bushels of wheat, and 11,808,775 barrels of flour. Total world exports of wheat and wheat flour, expressed in bushels of wheat, amounted to 1,002,430,000 bushels for the 12 months ended July 31, 1929, of which Canada contributed over 40 per cent.

The British Isles took 208,571,743 bushels of Canadian wheat and 2,637,867 barrels of flour, more than one-half of the total exported. Japan was the Dominion's next best customer of wheat with 22,700,487 bushels; the Netherlands were third with 22,121,980 bushels; Belgium fourth with 16,377,116 bushels; Italy fifth with 15,571,311 bushels, and Germany sixth with 14,693,724 bushels. The other purchasers of Canadian wheat are widely scattered throughout the world.

China was first in the list of consumers of flour with 3,040,667 barrels, surpassing the British Isles which took 2,637,867 barrels as above. Germany stood third with 1,097,289 barrels.

Flour produced from the crop of 1928, made a new record for the flour milling industry in Canada. During the crop year ended July 31 last, wheat ground in commercial flour mills totalled 44,786,316 bushels as compared with 36,842,296 bushels during the crop year 1927-28. This is an increase of over 7,950,000 bushels. Flour produced amounted to 20,893,232 barrels as compared with 18,910,384 barrels for the previous year. This increase amounted to 1,982,848 barrels of flour.

During the same period exports of wheat and flour amounted to 11,808,775 barrels, and 9,805,754 barrels respectively. The increase in exports was 1,945,021 barrels, or practically identical with the increase in flour production.

During the crop year 1928-29, Canada made new records in the production and export of wheat and in the manufacture of wheat flour. In addition to her position in the "wheat field," Canada produces nearly ten per cent of the world's oats, and ranks eighth in cheese production, and fifth in that of butter.

Contests Canada's Claim

South Africa Says It Has World's Record Milk Producer

South Africa is contesting the claim made in a cable from Ottawa that a Canadian Holstein cow, "Teakie Waldorf" is the world's record milk producer. South Africans claim an Orange Free State cow, "Butterfly," produced no less than 30,004 pounds of milk in 365 days, containing 1,254 pounds of butter. The yield is verified by an official government test. Furthermore, there are a number of other cows in South Africa which have "surpassed" "Teakie Waldorf's" record, it is stated.

"Shall we escape from the dull company?"
"Can't I am the host."—Hummer, Hamburg.

W. N. U. 1877

Taking Safety Measures

Compensation Accidents Are Showing a Considerable Increase in Ontario

A New Year's resolution which we recommend to everyone may be summarized in the expression "Safety First." The advice is not new; it has been given frequently in many shapes, but the necessity for it remains.

The Workmen's Compensation Board of Ontario, for example, reports that during 1928, the accidents costing over its notice numbered 57,103, which was 7,705 more than in 1928, and that benefits awarded amounted to \$8,102,157, which was an increase of nearly \$1,000,000 over the previous year.

These increases, both in number and in benefits are out of all proportion to the growth of population. Industries are not becoming more hazardous nor are there many new ones which, in their nature, make employees more liable to accident. We do not know the reasons for these increases, but it is evident that still more care must be taken in all the trades which come under the jurisdiction of the Workmen's Compensation Board. In other walks of life the number of accidents is probably also increasing. One reason for this is the growing popularity of motors for both passenger and freight services. The streets are far more dangerous than they used to be, and it behooves all to exercise the greatest care in moving along or across them. In urging "Safety First," no one is properly open to the charge of teaching timidity. The fact is that bravado shows lack of common sense whether in trades or other occupations, in sports or in the simplest affairs of life. To exercise a fair amount of caution should be a universal rule.—Mail and Empire.

The Brandon Fair

Sixtieth Anniversary Of Entry Into Confederation Will Be Commemorated This Year

Manitoba's sixtieth anniversary of her entry into the confederation will be made the outstanding feature of the provincial exhibition, at Brandon, this year. Directors of the fair have decided to further plans in this connection, and attractions which will add to the occasion are under review.

It is probable that the exhibition will have several stand out attractions over and above the regular programme to be outlined for the association of western Canada exhibitions.

An important item under discussion will be the completion of the racing programme for all western fairs. For the first time, all of the exhibitions have decided to feature only running events, and as a result they will be able to offer inducements to the gallopers and a better balanced programme than previously. The matter of midway shows contracts will also be decided on at the meeting.

The Kansas City Star is at peace with all the world except the English who drive on the wrong side of the road, can't spell tires, call gasoline petrol, and call a radio set a wireless. However, we doubt whether the English will be much moved in view of the fact that the editor of the Star drives on the wrong side of the road, can't spell tires, calls petrol gas, and calls a wireless a radio set.

Old Timer Retires

Back in 1882 when the Canadian Pacific Railway was pushing through the bush in Northern Ontario on its way across the continent, the old-time engine had a lot of good work and it was fired by James T. Fallon, who had joined the road three years previously. On the last day of 1929, Fallon, for over forty years an engineer, closed more than fifty years of railroad service. His picture is inset with that of the old locomotive, No. 222, sister to the one on which he worked as a youth.

Regulations Governing Oil And Gas In Turner Valley Recommended By Commission

Mechanizing the Farm

66,230 Tractors Now In Use In the Prairie Provinces

Though the popularity of "Old Dobbin," as the farm horse is affectionately known, continues to hold a prominent place on the farms of Canada, the "Iron Horse," or the mechanical farm implement, is advancing in popularity, particularly among farmers in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta. There are, according to a recent estimate, a total of 66,230 tractors in operation on the 248,162 Canadian prairie farms, 14,507 of which were bought last year. In Manitoba there are 12,846; in Saskatchewan, 35,083; and in Alberta, 18,791 farm tractors.

The total of harvester-combines in use on the Prairies at the end of 1929, was 7,728, of which 3,295 were bought last year. In 1926 only 176 harvester-combines were sold. The following year the sales were 598. In 1928 they jumped to 3,657, an increase over the previous year of 611 per cent. Sales of threshers in the three Prairie Provinces last year totalled 2,085.

Canada Popular With Tourists

About Nine Million People From U.S. Visited Dominion Last Year

The growing popularity of Canada among tourists is indicated by the recent official estimate that about 9,000,000 persons from the United States visited the Dominion last year. Of this number 250,000 visited the national parks of Canada. Canada maintains 23 national parks and reserves located in different parts of the country with a total area of over 29,000 square miles. In these parks the outstanding natural beauties and wild life are presented. Hunting of game is forbidden and any visitor entering one of the parks or reserves with a gun must submit to having it sealed before entering.

Saskatoon Exhibition Surplus

Date Of Exhibition For This Year Fixed For July 21 to 26

A surplus of \$10,667.23 is reported by the Saskatoon Industrial Exhibition Board covering operations in 1929. This is considered very satisfactory in view of crop conditions at the time of the fair. The year featured large increases in exhibits of livestock, agricultural and industrial products, and the erection of three new buildings in the grounds. This year the date of the exhibition is fixed for July 21st to 26th.

The man who deals in sunshine.
Is the man who gets the crowds.
He does a lot more business
Than the one who peddles clouds.

The saddest news of the week is the story of the ambitious youth who joined the Navy to see the world and spent four years in a submarine.

Adequate regulation of the production of oil and gas in Turner Valley is recommended by the conservation commission appointed last year by the Federal Government. The commission has reported to the government and the report has been made public. The members of the commission were Dr. Charles Cannell, deputy minister of mines; A. W. G. Wilson, Charles Ross, R. C. Wallace and A. A. Carpenter.

After pointing out that the wastage of gas in Turner Valley now approximates 200,000 cubic feet per day, was equal to 9,000 tons of high grade coal, the report states the position as follows:

"It is obvious that in the Turner Valley present operations are rapidly and wastefully dissipating a great natural resource only about 10 per cent of which is usefully employed. This wastage takes place through the operations under license of about 40 producing companies. It is probable that the number of producers will be increased shortly and that the wastage also will increase. Only about 30 per cent of the area is operated under government license, the mining right of about 70 per cent having been alienated from the crown many years ago.

"These producers are primarily interested in obtaining as great a naptha recovery as possible in as short a time as possible. No voluntary steps of consequence have been taken to curtail wastages or to prolong the lives of the wells. While it may be to the advantage of the individual producer to obtain quick return from his investment, it is decidedly not in the national interest, nor is it in the ultimate interest of the producer himself to permit this rapid dissipation without utilization of a great national asset for the immediate benefit of a few."

In regard to a solution, the report recommends:

"The only solution which will make conservation possible is recognition of the fact that Turner Valley is a gas field and the formulation of rigid regulations for the purpose of controlling all phases of the gas producing industry. If existing legislation is not adequate to protect the public interest it should be re-drafted to meet the situation. These regulations should be administered uniformly by one body representing both federal and provincial parliaments. This is the first and most important step to be taken. Other measures can only be palliative. This action is also a prime essential to the further development of industries based on the presence of this gas supply in Alberta.

"Without regulation and without control of production, industries cannot be assured of an adequate supply of gas over a period of time long enough to warrant essential capital investments. New supply is not only to investments in the new distributing pipe lines but also to investment in manufacturing industries using natural gas and to the development of industry based on chemical and metallurgical research. If adequate regulation is provided a limited industrial development will result."

Canada's Progress Phenomenal

Characterizing Canada's developments during the twentieth century as relatively the most phenomenal the world has ever known, exceeding even the unprecedented development of the United States in the nineteenth century, Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce, delivered an inspiring address on the country's future development at a banquet of the Woodstock Board of Trade.

WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

Most of 7,000 women employed on the clerical staff of the British civil service voted "no" in a ballot on the question of whether women ought to retain their jobs after marriage.

Overcome by poison gas as his sons were pulling him up a 75-foot well on his farm, near Raymore, Sask., Mike Grymalski fell down the shaft and was dead when extricated later in the day.

The total cost of pensions in Ontario this year will be in the neighborhood of \$5,000,000, according to a statement made by Hon. Dr. Jamieson, chairman of the Old Age Pensions Board.

A total of 326,972 amateur radio receiving licenses were issued by the radio branch of the Department of Marine for the 1929-30 period up to the close of last year, according to figures made public. The total for the 1928-29 period was 296,926.

Formal request that the postmaster-general of Canada consider the early extension of the postal air mail service to Vancouver and other British Columbia points is contained in a resolution that has been unanimously adopted by the Vancouver city council.

Members of the Canadian Manufacturers' Association sailed from Halifax on the steamer "Lady Drake," to study the British West Indies regarding development of trade with Canada. The party will sail through the Indies as far as Demerara.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in complexion delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oily-textured skin or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Recommended also to soothe and make the hands flawlessly white.

Manitoba Fruit

Commercial Fruit Growing Now Placed On a Profitable Basis

Fruit growing on the plains of Manitoba is to be placed on a profitable basis, according to the marketing report tendered by Mrs. S. M. Loree of Carman, Manitoba, at the annual convention of the United Farmers of Manitoba, recently. Prospective fruit growers will be afforded accurate statistics on the yields and hardness of crops. Demonstration orchards in various parts of the province were established some time ago, said Mrs. Loree, but the reorganization work of the coming spring is expected to yield definite results. Apples, plums, strawberries, raspberries and currants are now produced commercially by about a dozen growers.

Important Factor In Airplane Of Future

Manufacturers Turning Their Attention To Building Safer Machines

Much is expected of what has been popularly described as a "fool proof" aeroplane that has come into existence with an award of a prize of \$100,000 following an exhaustive series of tests at Mitchell Field, outside New York City. The conclusion of these tests and the awarding of the prize is held to mark another forward step of great importance in aviation. Quantity production of high-speed machines was the natural consequence of the solo flight of Charles Lindbergh, from New York to Paris, and it is only within a comparatively recent period that aeroplane manufacturers have turned their attention to the element of safety as an outstandingly important factor in the aeroplane of the future.

There has been no divulgence of the details of the performance of the winning machine beyond the fact that it has a minimum gliding speed of 38 miles an hour. That a machine can loiter at an hour at a medium road rate for a motor car indicates what aerodynamic advances have been made in the safety of aeroplane operation. And it may be assumed that once the aeroplane is so made that its operation is approximately as safe as the motor car, people will take to the sky in much larger numbers than at present.—Regina Daily Post.

FAINT, DIZZY SPELLS Had To Sleep

Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes:—"I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed."

"My doctor said it was my heart and nerves, and that I needed a good heart tonic."

"I was advised to take
and I had not taken one box when I could lie down and sleep like a child." Price, 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Suggests Out-Door Museum

Would Be Attraction In Western Canada To Tourists

An out-door museum extending along the rights-of-way of railway lines in Western Canada in which concrete casts of the skeletons of dinosaurs, mammoths and mastodons would stand has been suggested by a member of the National Museum staff, Ottawa. The creation of such an out-door museum would serve as a monument to strange beasts which roamed parts of Canada millions of years ago, the official thinks and would, besides, be unique as an attraction to tourists travelling the railways.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

National Research Laboratories
Work on the new Canadian Government National Research Laboratories to be built in Ottawa, is about to start. The contract for the building has been let for \$2,774,000 and the work is to be completed in 14 months.

Recognized as a leading species for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

The letters of the English alphabet are about 2,500 years old. They have developed gradually from ancient picture signs like the Egyptian hieroglyphs.

Shark's teeth are used for money in some of the Pacific Islands; while in China they are mounted in gold to form attractive ornaments.

A Valuable Discovery

Carbon Monoxide Menace Can Be Eliminated Claims Professor Of Chemistry

The announcement, from Johns Hopkins University that a means has been discovered to eliminate carbon monoxide from motor exhausts comes at a moment when the health department is meeting nearly every large city in concentrating on this problem. Health officials of New York City recently began analyses of the air in the city's streets, seeking the carbon monoxide content, as a preliminary to some kind of a protective or remedial campaign.

Here and in other cities was the mounting record of hundreds of deaths annually, and authentic medical testimony that these accumulating poisons were fouling the air and endangering public health.

Dr. J. C. W. Frazer, Johns Hopkins professor of chemistry, discovered of the method which makes a closed garage safe for democracy, has for many years been known as one of America's foremost authorities in the field of catalysis, and it was by the use of a catalyzer that he learned how to make carbon monoxide behave. A catalyzer, the chemist explains, is a manager and introducer which brings together aloof elements.

Carbon monoxide, issuing from a motor exhaust and occasionally killing somebody, needs just a touch of oxygen to become as harmless as a church warden. This oxygen was available in the air, but wasn't even on speaking terms with carbon monoxide.

Dr. Frazer's catalyzer lured an atom of oxygen from the air, teamed it up with the carbon monoxide and the resulting carbon dioxide was safe for breathing. One may close the garage doors, turn on the engine, go to sleep under the car and live to tell the tale.

The catalyzer—and Dr. Frazer does not tell what it is—is like the old-time bartender who never took a drink. It sets up new chemical equations, but never takes any part in them.

"It's so good of you, doctor, to have come this far to see my husband."

"Not at all, madam, not at all. I have a patient next door and I thought I'd kill two birds with one stone."

SUNDAY SCHOOL LESSON FEBRUARY 9

WARNING AND PROMISES

Golden Text: "Every tree that bringeth not forth good fruit is hewn down, and cast into the fire."—Matthew 7:19.

Lesson: Matthew 7:1-29.

Devotional Reading: Proverbs 2:1-8.

Explanations and Comments

The Golden Rule, verse 12.—All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them. The context shows the meaning of the "therefore": since God is so good to us, we must be good to others. "With these words Jesus closes up the teaching of these chapters," said Martin Luther, "and ties them all up in a little bundle. For this is the law and the prophets—the two collections into which the Jewish writings were divided. 'Perhaps to a certain extent this was a current phrase, equalled all that was necessary, but no doubt, seriously meant; therefore it may help us to understand the statement in verse 17, 'I came not to destroy, but to fulfill.' The Golden Rule was Law and Prophets only in an ideal sense, and in the same sense only was Christ a 'Fulfiller.'"

Distinguishing False From True Leaders, verses 15-23.—Beware of false prophets, warned the Master. They come to you in sheep's clothing, disguised as holy teachers, but inwardly they are ravening wolves, rapacious workers of evil. The lamb or sheep was the symbol of innocence or harmlessness; the wolf, of all sorts of evil. "It was a time of religious excitement; the force of custom broken, the deep fountains of the soul bursting forth; witness the crowds who followed John and Jesus, and the significant saying about the Kingdom of Heaven suffering violence (Matt. 11:12). Such times call forth true prophets and also spurious ones, in religious sympathy with prevalent excitement, but bent on utilizing them for their own advantage in gain or influence, men of the Judas type."—A. S. Bruce.

How shall the imposters be recognized? By their fruits, said Jesus. Character is revealed by conduct.

Thousands Pay Radio License

Prairie Provinces Are Well Up In Number Of Owners

For the first time since radio broadcasting commenced, more than 300,000 owners of receiving sets in Canada have paid the annual license fee of \$1 this year. Of these just are located in Ontario and over 40,000 are in Toronto. Not all the people who own radio sets pay the dollar, in fact, it is known thousands dodge the tax. By provisions the number of licensed receiving sets is now as follows: Ontario, 146,662; Quebec, 49,780; Prince Edward Island, 509; Nova Scotia, 8,893; New Brunswick, 6,141; Manitoba, 18,728; Saskatchewan, 22,467; Alberta, 14,332; British Columbia, 25,981.

OPEN SORES
HEAL IN QUICKEST TIME KNOWN

Use the most famous ointment. Failure to heal. Then "Booth's Salve" healed them in few days. John Simard, "Booth's Salve" heals sores, ulcers, boils, burns, eczema, etc., like magic. All druggists.

Saskatoon's Progress

All Evidence Points To Rapid Growth During Past Year

The City of Saskatoon made substantial progress during 1928. Its finances are in excellent shape. A larger proportion of current taxes have been paid than ever before, which includes taxes on forfeited properties, and the net outstanding taxes amount to \$800,000, which is about \$1,000,000 less than in 1925. There was an increase of about 800 pupils in the schools. The electrical output increased about 30 per cent.; the sale of city owned real estate amounted to \$130,000 and passengers carried on the street railway showed a gain of 15 per cent.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills. After meals and neutralize the acids. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

ASTHMA

QUICK RELIEF obtained by thousands through use of Dr. J. H. Guild's Green Mountain Asthma Compound. Its pleasant smoke vapor soothes and relieves. Originated in 1880 by Dr. Guild, specialist in respiratory diseases. Also relieves catarrh. Standard remedy at druggists. 25c. 50c. and \$1.00. Get next package of 6 cigarettes. Canadian Distributors: Green Mtn. Co., Ltd., 288 St. Paul St., West, Montreal, Que.

MAY EFFECT BIG REDUCTION IN NAVAL STRENGTH

London, Eng.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that Great Britain's cruiser strength in naval estimates for the next ten years would depend on the results of the Five Power Naval conferences.

Asked what increase or decrease for the next two five-year periods of the naval estimates would result from fixing the number of cruisers at fifty, he replied: "There are at present 54 British cruisers built, and four others in an advanced stage of construction."

"The effect on the British estimates of fixing the total at fifty cruisers depends on the size of the cruisers laid down and the type of the cruisers built to replace those that become obsolete."

"The decision on these questions depends on the conclusions of the naval conference."

According to figures that Mr. Alexander gave to another questioner, the saving in the British naval estimates for the next six years would aggregate more than £52,000,000, if replacements of battleships as provided in article 20 of the Washington Treaty were deferred until 1936.

Mr. Alexander also told a questioner that decision as to proceeding with the three submarines remaining on the British 1929 naval program would be taken after the London conference had been concluded. The program originally provided for six submarines but three of these were later cut out.

The recent cancellation of two British cruisers was of no material significance, Mr. Alexander told a questioner who asked the reason for the abandonment and the effect of the decision on the unemployment situation.

"The suspension of work on these ships," he said, "was decided upon by the Government on July 1st, for reasons of high policy fully set out in a statement the prime minister made in the House of Commons, Jan. 14. As very little work had been done on these ships on that date the recent decision to regard them as cancelled is of no material significance and was taken in connection with the framing of the navy estimates."

The first lord of the admiralty said it had not been necessary to reduce dockyard employment in consequence of stopping work on these and other ships.

Endurance Test a Success

British Dirigible In Air For Fifty-Three Hours

Cardington, Eng.—The dirigible R-100 returned to her home port after a successful endurance flight lasting 53 hours.

The giant airship during that time flew a zigzag course over the southern part of England, crossed the channel to the Scilly Islands, flew back over Plymouth, the Isle of Wight, Dover, the Southeastern coast ports and once again over London.

She started in misty weather and arrived home in a mist.

Suggests Help For Byrd

New York, N.Y.—Dr. Howard T. Barnes, of McGill University, has suggested that chemicals might be used to hasten the break-up of the South Polar ice pack if Admiral Byrd desired it. The work would be done, Prof. Barnes said, by forcing one vital break in the pack at the key point and the manoeuvring an actual shifting of the ice mass.

B.C. Honors Pioneer Woman

Victoria.—The legislature of British Columbia, in its opening ceremonies paid tribute to the pioneer women of the province, who had helped lay the foundations of Canada on the Pacific. A dozen pioneer women occupied seats on the floor of the House, and received tributes on behalf of those they represented, the government and opposition.

The Belgian Congo has coal deposits of more than 1,000,000,000 tons.

W. N. U. 1523

Great Future For Canada

Sir Esme Howard Refers To Dominion's Envious Position

Ottawa.—A suggestion whereby Canadian trade may be enlarged with the West Indies, a tribute to Hon. Vincent Massey, Canadian minister at Washington, and an expression of confidence in the future of this country were the features of an address delivered before the Canadian Club here by Sir Esme Howard, British ambassador to the United States.

With regard to the Canadian minister at Washington, the British ambassador said that from the day Mr. Massey was appointed to this there had never been a shadow of any sort between them.

"We have discussed matters of common interest and matters of all kinds so freely that we have become friends and almost as brothers. But I should like to say this, that the establishment of the Canadian legation at Washington, so far from creating difficulties for the conduct of the affairs of our British Commonwealth, as some persons suppose, has on the contrary been a real help and assistance in the conduct of those affairs in the United States."

Expanding his theme on Anglo-American relations, Sir Esme pointed out to Canada's envious position in having on its frontiers no hostile neighbor.

"Some think that the north geographical situation of Canada is a drawback," he said. "But I don't feel so sure about that because it ensures you for ever from the danger of the problem of mixed races, which is a most serious one in southern countries; and it ensures you also from the relaxation of mind and muscle which often is the result of too constant contact with the sun god. You are endowed with thousands and thousands of square miles of fertile plains, with millions of horsepower of electricity waiting to be harnessed, with lumber and wood pulp almost incalculable, and lastly with a wealth of mineral deposits which have yet only just been scratched. You have all this and you have also the unpeakable blessing of political security without fear from attack from without."

"Who are your neighbors? On one side the North Pole, whose bears are not likely to prove a danger to this state; and on the other side a great and friendly country, with whom you have had for over a century an arrangement by which armaments were laid aside and the frontier line was left almost as free, from defenses as those between one state and another of the United States."

Manitoba Beekeepers

Meet In Winnipeg

Delegates Discuss Betterment Of Conditions Which Are Already Excellent

Winnipeg.—Manitoba bee keepers in the 23rd annual convention at the Royal Alexandra Hotel, discussed ways and means of bettering the already excellent conditions under which this province holds a three-year record in the Dominion for first grade granulated and extracted honey. The report of the secretary, L. T. Floyd, gives Manitoba's entire crop estimate at 6,899,339 pounds of honey, with an average of 144 pounds per colony. There are 2,856 apiaries and the spring and fall count of colonies rates at 47,595 and 43,726 respectively. W. D. Wright, of Souris, Manitoba, representing the district west and south of Brandon, from whence the finest grades come, was congratulated upon winning Dominion sweepstakes this year with practically all the prizes in the classes mentioned during the last three years.

Roy Mullen, of Myrtle, was another outstanding beekeeper, having obtained 26,000 pounds from 100 colonies of bees.

Pictures Are Proof

Toronto.—Helge Borup, a young Dane, who in three years became a successful farmer in Northern Ontario, has left to spend a holiday in the land of his birth, and in his baggage will be 5,000 feet of film which he will show in many parts of Denmark as pictorial proof that splendid opportunities exist for those who are not afraid to play the part of pioneer.

WILL LEAD PROGRESSIVE GROUP

H. C. Nixon, who has been selected to lead the Progressive group in the Ontario House during the coming session.

Authorities Firm On

Mennonite Question

Canada Will Not Permit Entry During Winter Months

Ottawa, Ont.—The attitude of the Canadian authorities with regard to the admission into Canada of the 6,000 distressed Mennonites in Germany is unaltered, and no permission will be given to bring them to this country during the winter months. This was stated by officers of the immigration department here. In the spring the department will give consideration to the case of these Mennonites, but no special privileges will be extended to them. Any action taken will be in conformity with the immigration laws and will be governed by the agricultural requirements of Canada then.

World Grain Show

Manitoba Agricultural Societies Urged To Take An Interest In Big Event

Winnipeg, Man.—An appeal to all societies to arrange at once for representation at the World Grain Show, at Regina, in 1932, was made by J. H. Evans, deputy minister of agriculture for Manitoba, in an address before the agricultural societies convention recently.

Every society in Manitoba should be represented at the show, said Mr. Evans. He rejoiced at the interest manifested by junior seed growers in the production of better seed.

Motorist Was Rewarded

Ottawa, Ont.—Wilfrid Lebel, young Ottawa motorist, brought a pair of skiers home from the Gaiety Hills when their car broke down on Sunday. He was surprised when members of the party asked to be dropped off at Government House. He went home and forgot about it until he received a letter of thanks from Her Excellency Viscountess Willingdon, accompanied by a handsome bouquet.

They say that little girls are made of sugar and spice and all that's nice. This can truly be said of this little picaresque because she belongs to the West Indies, where spice and sugar grow. Perhaps she is a little shy because the lady who took such a fancy to her was a very distinguished visitor to her home island. Both, Her Excellency Lady Willingdon, and the Viscountess Willingdon, Governor-General of Canada, were highly delighted with their cruise through the Spanish Main. This photograph was taken on board the Canadian National Steamship "Lady Somers."—Canadian National Railways Photograph.

Canadian Scouts Contingent

Governor-General Willingdon Thanks All Those Who Helped To Make Jambores a Success

Ottawa, Ont.—Success of the Canadian Scouts' contingent who took part in last year's jamboree, in England, was due in large measure to the generous aid of Canadians, said the chief scout for Canada, His Excellency the Governor-General.

"To the generous subscribers in all parts of Canada to the special fund I personally raised for this purpose," said Viscount Willingdon, "I wish to express very grateful thanks, and also to the various individuals who subscribed sums for individual boys, which largely increased the numbers of our contingent. I wish to thank, too, all members of the executive of the association here at headquarters, for their loyal, devoted work, very particularly the members of the jamboree committee, who, under the chairmanship of Colonel Snow, made all the arrangements for this undertaking."

Copy Was Clever Forgery

Expert Investigated So-Called Draft Of U.S. Declaration Of Independence

Toronto.—Faint pencil marks discovered by a handwriting expert left no doubt that the so-called draft copy of the United States Declaration of Independence, now in Toronto, was a hoax, says the Mail and Empire in a news story.

"One of the cleverest forgeries ever committed," said the expert when he had completed his investigation. A powerful magnifying glass brought into evidence lead pencil markings about the strokes of the writing, says the paper. These markings indicated the expert said, that the signature had been carefully drawn then inked in.

Farm Home Destroyed

Father and Daughter Die From Burns Received In Fire

Kerrobert, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farmer, died in the Kerrobert hospital. He had been there for 24 hours, in intense pain.

His injuries were received when fire practically destroyed his house following an early morning kerosene explosion, nine miles west of Tramping Lake. He and three children sustained burns in the explosion, one little girl, Nellie, aged 14 years, having succumbed to her injuries shortly after admittance to the hospital.

Prince Studying South Africa

Cape Town, South Africa.—Notwithstanding the fact that during his stay in Cape Town, the Prince of Wales is spending the nearest thing to complete holiday that he has enjoyed in years, he is devoting considerable time to increasing his knowledge of South Africa, her main interest and problems.

"JAMAICA SUGAR"

UNEMPLOYMENT ASSOCIATED WITH POOL POLICY

Winnipeg, Man.—The Canadian wheat pool's policy of holding wheat for higher prices has helped to create the serious unemployment situation as it exists in Canada, Mayor Ralph H. Webb, of Winnipeg, stated recently. His comment made at the western conference on unemployment, from the presiding chair, drew pronounced opposition from several delegates.

"I have not attacked the wheat pool in any shape or form," contended Mr. Webb in answer to criticism of his stand. "I am commenting only on the pool's present policy which has helped to make it right to practice. I hope it proves to be right."

"Hundreds of thousands of men have been laid off by the railways as a result of the pool's holding policy," estimated the Winnipeg mayor in his first resume of the unemployment situation. He mentioned that the facts that the 1928 crop was not yet paid for, and payments on the 1929 crop were yet to come, as additional items tending to cause unemployment.

Canada should turn an eye to the United States, where "holding policies" have been directed in vain against Great Britain, Mr. Webb believed. He mentioned the efforts of the United States to hold up Britain on beef, oil, cotton, rubber and tobacco, and resultant British moves to develop other resources.

Australia and the Argentine have quadrupled their wheat yields within nine and seven years respectively, the mayor held; Manchuria was producing 24,000,000 bushels where no wheat was grown six years ago; India had doubled her wheat yield in six years. Italy and France, the former never a wheat-producing country, "were now meeting almost all domestic requirements," he said, "and Germany—ever an importer, was now exporting wheat to Britain."

"We may find that the government has had a lot to do with the present policy," stated Mr. Webb, referring to the wheat pool's stand, "and that may not bear very close investigation."

Mayor John W. Hair, of Saskatoon, insisted that the government had had a lot to do with the present policy, stated Mr. Webb, referring to the wheat pool's stand, "and that may not bear very close investigation."

Strong protest against Mayor Webb's statements came from Ben Lewis, of Stouffville, Man., a director of the United Farmers of Manitoba. "These co-operative organizations came into existence through necessity," stated Mr. Lewis. "The farmers refused to produce grain at a loss, and insisted on a living wage. It is because agriculture is in such a low state that the whole country is suffering. Politicians come out into the west, talking of prosperity, while the very causes of the prosperity—the farmers—are almost poverty stricken."

Almost unanimously, at the opening of a western "jobless parley" called in Winnipeg, they stressed the gravity of present conditions, forecast early aggravation of the situation, and opined that the Dominion Government should aid in unemployment relief.

To Speak Over Radio

London, England.—Lady Astor, Conservative member of the House of Commons, will broadcast over radio to Canada and the United States within about a week. Her address will be designed primarily for women and will urge them to continue their efforts for world peace.

Another Royal Wedding

Vienna.—Dispatches from Bucharest say that the wedding of Princess Ileana, daughter of Dowager Queen Marie, to Count Alexander, of Pless, has been fixed for the second half of February.

Hockey News

The Senior hockeyists are having a busy week, with a game tonight with Dyson Bat terymen and another on Sat- urday with Beatrys. Seeing who they are to meet tonight, it looks as though they're due for a shock.

Local hockey fans who witnessed the game in Ed- monton Sunday afternoon be- tween Calgary's Junior Can- adians and Edmonton's Bruins report having seen a first-class hockey game.

Coach Lory took his hockey aggregation up to Onoway Friday. Stony led all thru the play to nearly the end of the 3d period, when Onoway scored 2 goals in quick succession making the final score 4-3 in their favor.

St Pat's played the Juniors at the local rink Sat. night. Each team played easy at the opening; but later on, when the visitors had got warmed up they began scoring goals, shooting 'em in until at the end of the third stanza the number was up in double figures. The Juniors were not in the best of shape, it being the evening after the Onoway performance.

A mixed team from the local Juvenile League beat a Boy Scout team from Spruce Grove, 9 goals to 3, on Friday last.

Hansen's Corners.

The Highland Brigade turned out in full force on the 25th to celebrate Burns' an- niversary and elect a school trustee for a 1-year term. Mr C Clark was elected. The Brigade retired in good order, singing "Blue Bannocks O'er the Border."

Mr S E Sharp was elected Sec-Treas. for one year.

On thinking it over, Mr Claude V Young will not be a candidate for Councillor in Div. 2.

Owing to the lessened de- mand, Hansen's Corners Still is only running one shift for the winter.

Mr Fred Wilkin has pur- chased the farm formerly owned by the late Forest Hooper.

Mr Dougal McDonald has trapped a black fox.

Mrs Kincart of Inga Dis- trict has purchased the SW. Qr. of 16, 51, 2w5.

The printed rumor that Mr Murd McLeod was leaving the district proves to be in- correct. The Sun regrets this impression was conveyed at the time he resigned from the School board.

Another meeting will short- ly be called, to consider ways and means for building the big Community Hall in this district.

There will be some new candidates for the municipal elections to be held later this month. There is a feeling in Div. 2 that no candidate will be elected there who is known to be in favor of the purchase of any of this big machinery we hear so much talk about. There is a lot of dissatisfac- tion over the new assessment, and unless the Councillors see fit to bring taxes down to a reasonable figure, they may be asked to show cause why they should retain office.

Church Services

Services will be held in St Philip's Church at 10 00 on Sunday next.

A Lutheran service in En- glish will be held in Stony Plain Sunday next at 7 30 p.m., by Rev. V. A. Osterman.

Service at United church Sunday evening at 7 30; Rev G A Sauder.

Duffield Doings.

Mr P Faulks made a trip to Pickardville last week, on a visit to his brother Ronald, who is in business there.

Mr and Mrs E H Pidgeon were Sunday visitors here.

For entering a beer parlor with a false birth certificate while under age, a youth from a Wabamun mine was fined \$20 and costs on Monday.

Auto License Reduction

A delegation from Alberta Motor Ass'n is waiting on the Government this week, to ask for a substantial reduction in the price of auto licenses. It is felt that this reduction is long overdue in view of the great increase in the number of cars and increased tax on gasoline.

The Old World Shows the New

When the third of the Great West Festivals opens at the Palliser Hotel, Calgary, March 19-22 next, a score of nations will contribute to the success of the affair in folksongs, folkdances and handicraft work of which a special exhibition will be held by the Alberta Branch of the Canadian Handicrafts Guild. At the previous two festivals in Winnipeg and Regina some astonishingly beautiful work was shown and interest will be stimulated at Calgary and throughout the province of Alberta by the offer of handsome prizes by the Canadian Handicrafts Guild. Some idea of their beauty may be gathered by the above lay-out which shows Rumanian spin- ner at work on a dress similar to the one, beautifully embroidered, she is wearing; Swedish weavers also attired in native costume; and some examples of wood sculpture, among them a couple of the Rumanians with peasant types of strong personality.

Agent, Stony Plain.

Sore throats need this Double-Treatment

RUBBED on the throat, Vicks relieves in two direct ways:

- (1) Its vapors, released by the body heat, are inhaled direct to the air passages; and
- (2) At the same time Vicks "draws out" the soreness like an old-fashioned poultice.

CHAPTER I.

Doctor Edward Howe, Wickfield's beloved and venerable physician, stopped his car before the old Davis house, while a girl who was vigorously polishing the sideboards by the wide front door turned from her perch on a low step ladder and waved a greeting. The doctor glanced at his watch, and deciding that there was time for a moment's relaxation, got slowly out, threw a mail to Grandma Davis who was at the window, and sat down on the porch below the girl.

"It's a big house makes you a sight of work, Charman Davis."

Charman turned, dropped her polishing cloth and took a seat on the step ladder.

"I suppose it does; but somehow I don't mind—it's such a beautiful house. I like to remember that my father and grandfather were born here, where I was born myself. This old house seems—well—perhaps you'll laugh at me, Doctor, but the house seems just as much a part of me as do my ancestors."

But the doctor didn't laugh. He looked up at the shining brass knocker on the door, put three generations before by Luther Davis, at the beautiful faintly above it, and at the small-paned windows of long ago. Then his glance strayed from the century-old elm at one corner of the house to the mammoth syringa bush (the pride of the village as well as of Grandma Davis), at the other, and he understood and sympathized with the girl's loyalty to the home of her forefathers.

Charman was right. It was a beautiful old house. It stood a fair red from the street, though it was built in the days when most Wickfield dwellings were set flush with the sidewalk. Charman's great-grandfather had explained (when curious neighbors commented on this fact), that he was unwilling to sacrifice the young elm tree but most of his questioners suspected that the underlying reason for this unusual proceeding was because great-grandfather Davis "hated dust."

This, at least, was the story that had come down to Charman, who declared that if her great-grandmother could have foretold the dust of the present day with automobiles

passing at forty miles an hour, she would have set her mansion in what was then the cow pasture!

"But if she had," commented Grandma Davis wisely, "it wouldn't have been near so handy for the shop."

Charman smiled. The shop, which was once the honored parlor of the old Davis house, was an innovation against which Grandma had bitterly rebelled when it was first suggested by Charman's widowed mother. At that time Charman was but a little maid of six, yet she remembered vividly the battle that took place before Grandma Davis capitulated to her daughter-in-law's irrefutable argument that it was more honorable for a Davis to run a shop in the best room than to go into debt.

She remembered also the day when the fine imported carpet was removed, and the contents of the highboy taken "up attic" in order to make room for the rolls of calico—the spoils of silk and cotton—the pins and needles—bright worsteds and other fascinating odds and ends which were to be paid for "by installment," whatever that was.

Wickfield was in sore need of a dry goods store, for Henry Oldham, who had run the general store for forty years, and one had to drive clear to Eastboro in order to match a skein of yarn!

Hence the neighbors, after a moment's shocked surprise, welcomed the thought of buying their fancy goods of Charman's mother; and as Grandma grew older, the little shop, against which she had fought so valiantly, became her greatest source of entertainment.

Charman was fifteen when her mother died, but she managed to finish high school, to go to the State Normal at Eastboro, and keep house for Grandma, while the old lady sat contentedly in the front window and waited on occasional customers, unless, as was usually the case, they waited on themselves. Indeed the Davis house would hardly have seemed natural without Grandma's face peering from behind that twenty-four-paned window. Once, stepping into an errand, Ezra Bascomb had offered to put a whole pane of glass in the lower sash, so she could see the passing better.

"I could do it easy enough some holiday," he urged; but the old lady shook her head.

"It's real kind of you, Ezra," she said gratefully, "but my husband's grandfather, Luther Davis, built this house, and I've never felt called to want it changed. Seems as if one pane of glass wouldn't exactly suit it, though I've no doubt Charman would find it easier to clean. Charman's terribly particular about windows. She says a soiled window can just spoil a nice, sunny morning; and I dunno but what she's right. Once when she was a girl she gave me a wiper for my spectacles. It's in the world, the world will never look quite right unless you keep your glasses bright; and I presume the same thing applies to windows. No, Ezra, I'm just as obliged to you, but I guess we'll stick to Grandma Davis's old windows. Charman thinks the world and all of them."

"Well," responded Ezra, good-naturedly, "there's no accounting for taste. Now the first thing Emmy wanted when we was married, was for me to yank those small-paned windows out of the old house, and put in new ones. She's kept at me ever since, and at last I've done it; and I will say Grandma, that they look handsome. But that city feller, who's living down at Irving Plummer's, acted like I'd broke all ten commandments when I suggested changin' the windows along with the other improvements he's put in. No, there's no accounting for taste. He bought the place and furnishings as they stood, and he's give Hetty Plummer's gold oak extension table, the one she sent clear to Hartford for, to his hired man, and he's usin' an old mahogany drop-leaf that Grandma Plummer kept her preserves on in the cellar!"

"Do tell!"

"Yes, ma'am," replied Ezra, moving toward the door, "that's Gospel truth, or may I be struck dead where I stand."

He felt in his pocket for his cap, and drew out a scrap of bright blue silk.

"Gorry! I clean forgot what I was here for. Emmy wants a spool o' silk to match this sample. She's makin' her new waist to wear to the strawberry festival."

"Let's see," said Grandma eagerly, stretching out a hand for the sample.

"That's real pretty. Emmy always did look best in blue, even when she was a baby. You open the top drawer, Ezra, and find a spool to match."

"Emmy said," hesitated Ezra, like a well-trained husband, "that I was to let Charman pick it out. She says I ain't got an eye for color."

Grandma chuckled.

"And I suppose she won't trust me, either. I dunno as I blame her. My eyes are getting old along with the rest of me. Charman's up attic! You whistle at the back stairs and she'll come down. There's she's coming now."

"Dearie," she called, "you come right here. Emmy Bascomb wants you should pick out a spool o' silk to match her waist. Seems to me I remember the blues are getting sort of low."

Yes, the little shop had been Grandma's unfailing source of entertainment for many years. Even when with the invasion of automobiles, Eastboro became more accessible, the neighbors did what shopping they could at Grandma's, not only to help her out, but to make an excuse for running in to chat during the long days when Charman was away at school. It, in many ways before, Wickfield had been shocked at the thought of a shop in Lawyer Davis's best room, it had long since become as accustomed to it as had Grandma herself, though at times the old lady wondered, with an inner chuckle, what her husband's father was thinking as he viewed the change from his mansion in the Eternal City.

For Roger Davis had been a lawyer—a man of education. His office, a small, one-story building, still stood across the drive that led to the big barn. He had been what in those days was called "a scholar and a gentleman," but although he sent his son to college, "Grandpa Davis," after a year of reading law in his father's office, had "gone back to the land"; and being more of a dreamer than a worker, he left the old place rather soon after than when he fell heir to it. For he had found it pleasant as well as easier, to let his horses rear when they should have been dragging the plow, while he feasted his beauty-loving eyes on the hills that surrounded Wickfield on every side, and composed "poetry."

Grandma was very proud of Grandpa's poems. Once one of them was printed in the Eastboro "Telegraph," and the minister read it from a pulpit. That was a proud day for Grandma Davis. She still kept a clipping of the poem between the pages of her Bible, and read it every night after she said her prayers. To her loyal heart it was a legacy more beautiful than gold or precious stones.

And now, though she and Charman were left alone in the big house, it never occurred to them to leave it. To Grandma it was "home." To the girl it was not only home, but something that gave her a sense of satisfying pride. For was it not something to be proud of, to live in a house built by one great-grandfather? This alone was compensation for the things she lacked—things that were, to many a girl of her age, the breath of life.

Whaling Up-To-Date

Airplanes Being Used As Scouts By Norwegian Fleet

A Norwegian whaling fleet now at work off the ice banks of the Antarctic is accompanied by two aeroplanes which are being used to scout for schools of whales. It has been found that in certain years the whales are much more difficult to find than in others; in fact, they seem practically to disappear, and it is hoped that the aeroplanes with its greater mobility and wide range of vision will be able to help in solving the problem. The machines can be equipped with three sets of landing gear: wheels for landing on the deck of the "mother" vessel, pontoons for the water, and skis for the ice. A wireless "there she blows" will summon the fleet when the aeroplanes sight their quarry.

IF THERE IS A BABY IN YOUR HOME

There Also Should Be a Box Of Baby's Own Tablets

To keep her little ones well is the constant aim of every mother and to help her in this task she should always keep a box of Baby's Own Tablets in the home. These Tablets have saved many little lives when illness came on suddenly.

The majority of troubles which afflict little ones are those which arise from a diseased condition of the stomach and bowels. It is in quickly correcting these disorders that Baby's Own Tablets show their value. They banish constipation and indigestion; correct colic and diarrhoea; break up colds and simple fevers and allay teething pains. Concerning the Tablets Mrs. E. Roberts, Cap. Inf. Can., writes:—"I always keep Baby's Own Tablets in the house as I know of nothing to equal them for little ones."

The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Seven Hundred Mile Line

Length Of Surveyed Boundary Between Alberta and Saskatchewan

The boundary between Alberta and Saskatchewan is the Fourth Meridian of the Dominion Lands survey system, which coincides approximately with the 104th meridian of west longitude and under instructions from the Survey General, Department of the Interior, has been surveyed from the International Boundary north to Lake Athabasca, a distance in a straight line of nearly seven hundred miles, constituting one of the longest surveyed straight lines in the world.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on the health of children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the infested and distressed child to health and happiness. They are an excellent remedy for these evils.

A Remarkable Exhibit

Edmonton Has Fine Display Of Northern Grains and Grasses

Grown 300 miles north of Edmonton, as the crow flies, at the Dominion Experimental Farm, at Fort Vermilion, Alberta, on the Peace River, a most remarkable display of grains and grasses of last season's crop are on display at the Edmonton Chamber of Commerce.

Exhibits include thirteen varieties of wheat grown in experimental plots; eight of oats, five of barley, two of flax and two of rye. The wheat includes such well known varieties as Garnet, Red Fife, Marquis, etc., and the oats include Banner, Leader, Victory and two varieties of hull-less oats—Laurel and Liberty.

Twelve of the 13 varieties of wheat sown April 30, the other, Marquis, May 8. Three of the varieties were cut August 15; significant that Marquis, sown eight days later than all the other varieties ripened as rapidly as the two others sown eight days earlier—Ritchener and Red Fife.

All samples are of excellent quality, with strong root growth, sturdy stands and plump, well-filled heads, with heads ripened perfectly.

Calgary's Building Permits

Calgary's building permits for the year numbered 1,983 and had a recorded value of \$11,417,194, compared with 484 in 1928, with a value of \$6,302,142 for 1928.

Minard's—The Great White Liniment.

Little Helps For This Week

"The Lord our God will we serve, and His voice will we obey." — Joshua xxiv. 24.

So high is grandeur to our dust, so near is God to man. When duty whispers low, "Thou must." The youth replies, "I can." — Ralph Waldo Emerson.

When in the crises of your duty the way of peace and right summons you with its sweet compulsion, it is the call of the Eternal Right making itself heard in your waking soul. It is the summons of God through the voice of duty. Not far away lie the sources of religious trust; not in the theories of the stars, or seas, or excellent man, but in the inevitable experiences of our daily mistakes, and of our sincere repentances. The life of God and the life of man are all interwoven in the web of human experiences.—Francis G. Peabody.

Cost Of Translations

French and German Cheapest, and Finnish Is Dearest

Language experts state that something to interest them in the tariff of a translation firm I have just been looking over, writes "Looker On" in the London "Daily Chronicle." French and German, it seems, are the cheapest languages to translate. Italian and Spanish are a little dearer, and Dutch and the Scandinavian languages come next on the list of charges. Greek translations cost considerably more than Russian—they rank in cost with Rumanian, Hungarian, Serbian and Czech. Lithuanian comes next, while Finnish, "dearest" language of all, costs about eight times as much as French.

Exhausted From Asthma. Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Measured The Earth

The earth is not round after all. It is flattened at the poles, and has quite a pronounced heaviness about the middle. A. H. Miller, a Canadian scientist attached to the Dominion Observatory, in Ottawa, has completed measurements this year which show the diameter through the pole is 26 miles less than through the equator.

Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I got nervous and run-down and was in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound, and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now."

—Mrs. J. M. Miller, R. No. 3, Barron St. East, Hamilton, Ontario, Canada.

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MED. CO., LOWELL, MASS., U. S. A. Sold Everywhere.

Falling Hair

Turn to a proven hair grower—Minard's of course. Will cleanse scalp of dandruff and promote a healthy, glossy growth. Rub into scalp four times weekly.

Calendar.

FEBRUARY—
6—Hockey, Dyson Battery team, at Stony.
7—Masque dance at Holborn.
8—Hockey, Baatys at Stony.
10—Elections for Stony Plain Councilors.
14—Dance, Muir, Lake Community Hall.
14—Dance at Onoway.
15—Nominations of Inga councilors.
19—The John Deere Tractor School, held in Edmonton.
22—Inga Elections.

Stony Plain and District

Mr Val Mohr, Lamont, was a week-end visitor in Stony Plain. He was accompanied by Mr Conrad Giam, who had been a contractor here some 15 years ago.

Remember the new address of the Stony Plain Pharmacy, Main St., one block south of the old stand.

Mr and Mrs E H Pruner of Edson spent from Sunday until Tuesday with the family of Geo Liebert.

August Sherman is visiting friends at Grand Prairie.

The local Moose Lodge held its regular bi-monthly meeting Monday night.

The United Ladies' Aid met yesterday at the home of Mrs Willie.

The subject at the United Church service (Rev G A Sander, pastor) on Sunday last was "The Transformation of the Commonplace."

Mr Jac Ursel Jr. had his Studebaker touring stolen in the City, Monday, from in front of the National Hotel. He had had the car but two days, having on Saturday last traded his Jewett Sedan for it.

In the Supreme Court.

A case of interest to residents of Stony Plain was heard in the Supreme Court Wednesday 29, before the Hon. Mr. Justice Ives. The plaintiff Jacob Miller sued the defendant Gus Zucht for the sum of \$616 and costs upon a promissory note which defendant had signed as surety. At the conclusion of the case judgment was given for the plaintiff in the sum of \$250 without costs. T H Wells appeared for the plaintiff and George J Bryan for the defendant.

Holborn Happenings.

A meeting of the Holborn Wheat Pool Local will be held in the Hall Saturday evening next, Feb. 8th, at 8.30 p.m. Mr Mackenzie, of the Pool's head office, will address the meeting, and Delegate Powell will give further details of his trip to the Convention. The members will, no doubt, be out in full force.

There will be meetings also the same night of the Live Stock Pool and the Dairy Pool. In connection with the latter, Delegate R Larson will make a report of the doings at the convention recently held in Edmonton.

Everything is in readiness for the big event of the season—the masquerade dance being put on at the Hall tomorrow night, Feb. 7th, by Holborn U.F.W.A. Barth's orchestra will supply the music.

Larson Bros., painters and decorators, are filling engagements up in Stony.

Ratepayers of Spruce Grove M.D. to Meet.

A meeting of ratepayers of Spruce Grove Municipal District will be held in Winterburn Community Hall on the afternoon of Saturday, Feb. 15th, when nominations for Councilors will be taken. A prominent resident of the municipality will be in the chair.

The retiring Councilors in this Municipality are: Latimer Div. 1, Wudel, Div. 3, Hagen, Div. 5; and each is eligible for re-nomination.

It is probable there will be elections in one or two divisions; and these will be held on the Saturday following the nominations, Feb. 22.

Spruce Grove News

Miss Sylvia Taylor was a week end visitor with Mrs R J Elder.

Mrs E C McLaughlin is assisting her daughter, in Calgary.

The local Scouts lost their hockey game in Stony Friday with the Juveniles, but are going up again Sat, Feb. 15.

Mr Waltart Graden, who has been convalescing in Edmonton following a major operation, is expected to return to his home here, this week.

"Sport" MacKean took a large party to the City Sunday afternoon, to see the Calgary-Bruin hockey game.

Secretary Medcalf has called a meeting of the Wheat Pool Local, to be held at the Grove on Saturday afternoon next, Feb. 8th, at 3 o'clock, when addresses will be given by Director Mackenzie and others. A full attendance is requested.

The Lafleur family, which has been in needy circumstances, is now receiving a subsistence gratuity of \$15 a month from the Government.

The funeral took place on Saturday last of the late Mrs B H Rennie, who had passed away on Jan. 29th, in her 64th year. Her husband predeceased her last July. She is survived by one son Edward, of this district. Service was held in United Church, at Spruce Grove, by Rev G A Sander, and interment took place in Spruce Grove cemetery.

The trustees of the Grove S.D. held another meeting on Friday night.

The United Ladies Aid held their regular monthly meeting Sat. afternoon at the home of Mrs McKean.

The lady members of the Bridge club participated in a bridge game Sat. evening at the home of Mrs Sherwin. A very pleasant time was enjoyed by all.

Here and There

(461)

The largest passenger liner into the port of Saint John in 1908 was the *Paristat*, of 4,500 tons; nowadays the 20,000-ton *Duchess* of York is but one of four "Duchess" ships using the port, said Hugh A. Allan, founder of the Allan Line of Steamships, on landing at Saint John recently, and commenting on the growth of the port. He was certain it would continue to grow in the future as it had done in the past.

There is a huge market in Europe for breeding silver foxes which will absorb all that Canada has to offer for many years. Is the view of J. S. Wedlock, of St. John, passenger on the *Duchess* of York, who has been spending some time in Sweden where he established a fox farm stocked from his farm on Prince Edward Island.

Sponsored by Hon. R. Randolph Bruce, Lieutenant-Governor of British Columbia, and under direction of Harold Eustace Key, musical director for the Canadian Pacific Railway, the second annual sea music festival has just been held at the Empress Hotel, Victoria, with great success. Artists of international repute took part in the revival of the sea chanteys that men sang when wooden ships moved by iron and saw sailed the Seven Seas.

During the five years that the Canada Colonization Association has been under the control of the Canadian Pacific Railway, it has settled 4,270 families on 84,268 acres at a purchase price including equipment of more than \$2,000,000, was the statement of W. M. Neal, general manager of the railway's western lines, speaking at the first annual meeting of the Saskatchewan branch of the Association held at Regina recently.

A vast amount of serious work is being done along constructive lines in oil development in Alberta. G. G. Ommanney, director of the Canadian Pacific Railway's department of development, stated in a recent interview at Winnipeg. A million barrels of oil had been taken from western Canada last year and prospects were good for greater production in 1920, he added.

Seven Canadian Pacific special trains will be required to carry some snowshoers, members of clubs in Quebec Province and New England, who are coming to the convention of snowshoe clubs to be held at Ottawa February 1-2. Two special trains will be needed to carry the delegation from Maine and two more for that from Montreal.

Another new Canadian Pacific steamer took to the water recently at Glasgow when the "Princess Elizabeth", 5,000-ton vessel for the British Columbia Coastal Service was launched from the yards of the Fairfield Shipbuilding Company at Govan by Mrs. R. B. S. Beland, daughter of W. R. MacInnes, vice-president of the Canadian Pacific Railway. The ship can reach a speed of 16½ knots, will have sleeping accommodation for 465 passengers and day accommodation for 1,500.

Fish caught in the inland lakes of the Province of Saskatchewan have an annual value of over \$500,000. Among the principal kinds of fish caught are cold-eyes, herring, pickerel, pike, muskellunge, mullets, trout, tullibee and white fish.
